

FLOW EZY FILTERS - FILTER CART PORTABLE FILTER & OIL TRANSFER SYSTEM

Filter carts are widely used for a number of different operations.

- Filtering new fluids before introducing them into the system
- Reconditioning fluids that are already in use in the system
- Cleaning up contaminated oils
- Removing water from oils (with optional water removal filter)
- Filtering out system oil resulting from a failure of a system component
- General maintenance of a system to keep it running at peak efficiency

Filter carts are a cost-effective way to extend lubricant life while contributing to a best practice lubrication program. After all, clean fluids make happy machines!

Whether you choose the basic filter cart (shown on the right above) or the customizable filter cart (shown on the left above), your equipment will be happy you are allowing them to run at peak efficiency. Let's take a look at both filter cart types....

BASIC FILTER CART

- 5 or 10 gpm pump and motor assembly
- 25 and 10 micron w/ cellulose media spin-ons (optional 3rd stage, 3 micron water removal spin-on)
- Wand connections

CUSTOMIZABLE FILTER CART

- 5, 10, or 20 gpm pump and motor assembly
- Various voltage selections
- Various connector options
- 1, 3, 6, 12, or 25 micron microglass media double length spin-ons
- Filter by-pass option
- Sample port options
- System relief valve option

ALL FILTER CARTS ARE MADE IN THE USA!

SPECIAL NOTE TO FLOW EZY DISTRIBUTORS!

Are you looking for ways to increase revenue? Are you looking for additional ways to service your customers? There are two ways you can do this while at the same time enhancing your credibility in the eyes of your customer. You would really be showing them you care about their business.

1. You can purchase a filter cart to service your customers. By offering to visit your customers' plants or shops to filter their oil in their equipment to keep it clean and flowing efficiently, they don't have to worry about their equipment and it's components. You fill a need for your customer and merely invoice them for your labor and the filters. In a matter of a few visits, the filter cart has paid for itself.
2. You can purchase a filter cart, keep it on hand, and rent it out to your customers. Your customer will appreciate that you have this type of equipment on hand to rent so they don't have to purchase it. You charge them a rental fee, per/day or per/week, or whatever arrangement you want, plus the additional filters.

It's all about building relationships. This is a win-win situation for you and your customer. It will put you one step ahead of the competition.....and if you need literature to hand out to your customer, just let us know. We'll even provide you with a copy.
